

We deliver historical AIS positions and port calls.

The source of historical data may be Terrestrial AIS receivers or Satellite AIS receivers.

- Data is delivered in CSV format.
- For each position we provide:
LON, LAT, VESSEL MMSI, STATUS, SPEED, COURSE, HEADING and TIMESTAMP (UTC)
- For each port call we provide:
PORT ID, PORT NAME, VESSEL MMSI, TIMESTAMP, ARR/ DEP
- We may also provide additional vessel parameters, e.g. vessel name, type, dimensions, flag, etc.
- Time resolution of data depends on a number of parameters at the specific point and time.
- For a moving vessel you should expect at most an update every 2 minutes.

Apply for Historical data

Learn more about historical data costs and usage by logging in to MarineTraffic.

You will find all you need right here!

You will also be able to apply for data you are interested in.

If you do not have an account with MarineTraffic, you may register to a free plan here (/en/one_page_application/solutions#OnlineServices).

Tips for efficient data mining

- › Define the parameters of your data selection as fully as possible.
- › Define whether you are interested in historical positions or port calls.
- › Are you interested in an area? Specify **min/max LAT & min/max LON**
- › Are you interested in a period of time? Specify **Date/Time From & Date/Time To**
- › Are you interested in vessels? Specify their **MMSI** or **Name** or **IMO**
- › Are you interested in a port? Specify **port name**, **country** and, if possible, MarineTraffic **port ID** number.
(note: the port ID number is included in the URL of the port page.)
- › Specify whether you are interested in data from **Terrestrial** and/or **Satellite** receivers.
- › Specify whether you need any additional vessel parameters (e.g. vessel name, type, dimensions, flag, etc.).

Cost of Historical data

Cost is a function of the volume of records delivered and of any extra processing that you may wish us to perform.

- Example: basic historical vessel positions cost

number of Vessel Positions	entry level cost
1,000	€ 133
10,000	€ 327
100,000	€ 802
1,000,000	€ 1,969

- Example: basic historical port calls cost

number of Port Calls	entry level cost
100	€ 109
1,000	€ 292
10,000	€ 787
100,000	€ 2,119

- › The above position costs are for data from Terrestrial receivers.
- › Final cost will depend on any additional parameters and/or additional filtering and processing.
- › Data from satellite receivers have a different price structure and we provide separate quotes.
- › Please submit your request in the form below to receive a quote from us.
